SECTION 5 - SUPPLEMENTAL SERVICES, (CONT'D.)

5.21 Virtual Telephone Number (N)

5.21.1 Description

Virtual Telephone Number (VTN) service allows a Customer to obtain a telephone number from a rate center in which it has no physical location and associate it to a physical service location in a rate center other than where the telephone number is natively associated. Calls made to the VTN will traverse the PSTN and/or the Company's voice network and terminate to the Customer at the designated physical service location via the Customer's eligible voice service connection. VTNs may be assigned from the Company's Sonus supportable rate centers. The Customer must subscribe to an eligible voice service, and a minimum of one (1) local telephone number that is native to the rate center in which the service physically terminates must be assigned to the Customer. This telephone number is required for rating purposes in the event the Customer transmits a VTN on an outbound call. Calls made to the VTN will be charged to the caller and rated based upon the caller's local calling area and the normal local calling area of the VTN. Should the Customer transmit a VTN on an outbound call, the call will receive a local calling area based on the physical service location. Should the Customer transmit a VTN on a call made to 911, authorities will respond to the address of the physical service location. Unless the Customer purchases multiple trunk groups, all VTNs and ITNs will share all call paths associated with the eligible service to which calls are terminated in the order in which calls are received.

5.21.2 Maximum Rates and Charges

Rates are based upon the location where calls are physically terminated.

Monthly Recurring Charge Per Number	\$1.00
Nonrecurring Charge Per Number	\$5.00
